How to install CMDFlash on win7 64 bit

please read carefully the following instructions:

CMD Flashtec SA will be not liable for any damage, loss of profit or any issue due to the following procedures.

remember that you need **a 32bit windows XP pc where cmdflash sw is properly installed and working**

1) Unplug cmdflash interface from the 32 bit XP and 64 bit pc

2) download FTDI driver http://cmd.flashtec.ch/downloads/CDM20824_Setup.exe

3) execute it on the 32 bit XP and 64 bit pc

4) contact support@flashtec.ch and ask to enable 64bit version on your profile

5) plug cmdflash interface on the 32bit XP machine and **update** it to version 3.2.0.98 or greater (also if you have already downloaded it) , this will enable the 64bit activation on the interface.

6) start the sw on the 32bit pc and follow instructions, an update message will be prompted then wait until it will show "DONE" and then "ready…" in green.

7) unplug cmdflash interface from 32bit XP pc

8) run CMDFlash setup on the 64bit pc and plug CMDFlash interface only when requested
